

Seven (7) Reasons Employees Leave and What to Do About It

By: Leigh Branham

Short Description of the Presentation:

It's happened to every listener. One day, with no warning, one of your employees hands in their two week notice or perhaps simply leaves with no notice! You are in shock. What happen? Why did they leave? Why didn't I notice a problem before it got to this point? Sound familiar? It does to most of us. They say an ounce of prevention is worth a pound of cure. Well this presentation by Leigh Branham is going to provide "several" ounces of prevention by sharing about the seven basic reasons employees leave their company and more importantly, what to do about it.

Key Points:

This presentation will provide the tools and understanding you need to become fully aware of employee dissatisfaction before it comes to a head in the form of their leaving the company. You will learn to:

- Why a **key business objective** should be making your office a great place to work.
- Why it's so difficult to **retain employees** in the first place.
- How to **address the needs** of all 4 generations in the workplace.
- How to implement new practices that **increase employee engagement and reduce turnover**.

And much more!
