

GPS Vehicle Tracking: Is It Right For Your Company

by
Michael Flournoy

Short Description of the Presentation:

Golly, I didn't know GPS vehicle tracking systems did all that! That is the reaction that most people have after listening to this presentation. Listen and learn. You will be glad you did.

Benefits of GPS Vehicle Tracking Systems

- Live maps (view tech location)
- Keeping up with vehicle maintenance
- Set up custom alerts and email the company if something is happening that should not be happening
- Harsh driving (tracks maximum speeds and driver habits, etc.)
- Geo Fence Alerts (where the vehicle is located and when it leaves the area)
- Stop/Start Reports
- Fuel card tracking integration (see who filled it up, where and how much)
- Tracks mileage and why it may be low
- Track miles driven, by state, if needed
- Job site report (how often was the tech there and how many times did the person leave)
- Proof of service (when was the tech there and for how long)
- Driver centricity (who drove the vehicle, how long and where were they)
- Create incentive programs for good driving habits
- See vehicles on your "smart phone" at all time
