

Grandy & Associates COVID-19 Training Policy

At Grandy & Associates, we love training. We also know that COVID-19 has changed all of your plans for training this year. We want to make sure all who participate can not only utilize what we teach immediately, but remain safe and healthy in the process.

It is for this reason that we want to be very clear in our policy for future “in person” training classes that we conduct. This way you know what to expect from us and what we expect in return.

1. Grandy & Associates stands ready to conduct training classes both in person and as Live Instructor Led classes in a way that insures the health and safety of our customers.
2. We will ship the following supplies for all anticipated students in each class:
 - Individual hand sanitizer packets
 - Facemasks for any who would prefer to wear them
 - Pens so they don't share when signing in on the roster & taking notes
3. We ask that the front of the class room have enough space to allow for 6' of distance between the trainer and the first row of tables. If this is not possible, we would ask that the first row not be used for students.
4. We would ask that if the program is conducted in your facility that the chairs and tables be wiped down prior to students arriving.
5. Student chairs should be set to allow for appropriate social distancing.
6. If food is being served, we ask that you do not use “potluck” style meals. Instead, provide individually wrapped food items.
7. We will honor and abide by any additional safety precautions you have in place for your facility.

Keep in mind that most programs that we have previously conducted in person are now also available to be held virtually. All of our one and two-day classroom Factory Authorized Training is now approved for Live-Instructor Lead Online Training - and it works great!

We have conducted a few of these with great results. It's not just the floating head above slides. Our studios are set up with full green screen technology to allow us to be interacting with the content and your contractors in real time. We use several different tools to promote interaction between students and trainers throughout the program.

Call us to schedule your training either in person or virtually today.
