

# PLUMBING 101 ONBOARDING

HIT THE GROUND  
RUNNING

## Class Description:

Over the past several years, everyone involved in the plumbing field has felt the effects of the labor shortage in the industry. More than ever before, people with little or no plumbing experience are being hired by local contractors.

This 8-hour course is spread over two half-days and specifically designed to provide your new personnel with a solid grasp of foundational Plumbing terms and principles including:

- Exploring the history of plumbing and the “Health of the Nation” - how we got here
- Explaining plumbing terminology and acronyms
- Understanding what makes up the full plumbing system - It’s more than just your home
- Identifying key components in a plumbing system
- Safe plumbing practices – returning home intact

The goal of this program is to provide new plumbing-related personnel with a conversational knowledge of the plumbing industry.

Whether you are working the service counter, answering the phone at a local dealer or an aspiring plumber, this class will be a springboard to a successful career in the plumbing industry.
